

Special Local Need

TRICOR® DF 75% Dry Flowable Herbicide

EPA Reg. No. 70506-103

EPA SLN No. ID- 090006

For use in established perennial bluegrass grown for seed

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF IDAHO

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This label must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA-registered label.

Used as directed below, TriCor DF will reduce competition from volunteer seedlings of the indicated crop, annual Bromus species, annual ryegrass, windgrass and annual bluegrass. TriCor will control rattail fescue, henbit, ivyleaf speedwell, chickweed, mustards, and shepherdspurse. Control of the volunteer crop and grassy weeds may be enhanced by adding wetting agents containing crop oil. Follow the directions for use and rates recommended on the wetting agent label.

Do not apply this product through any type of irrigation system.

CROP	PEST	RATE TRICOR DF
Bluegrass	Weeds (see federal label)	3 – 6 oz/A
<p>Apply the specified rate per acre as a broadcast spray in at least 15 gallons of spray solution per acre when the volunteer grasses are in the 1 to 2 leaf stage following rainfall or irrigation but before active spring growth. Applications made after mid-March may result in excessive crop injury and/or failure to control weeds. Allow at least 120 days between application and harvest. Do not apply more than once per year.</p> <p>Notes: Established grasses are those which have been harvested at least once for seed, or were planted one year or more prior to application. Do not use on sand or loamy sand soils, or soils with less than 1.5% organic matter and/or soil pH of 7.5 or above or excessive injury will occur. The crop and crop residues may be fed to livestock or used as bedding. If the seed crop is terminated and grazed or cut for forage, allow at least 28 days between application and use as animal feed.</p>		

Mixing: Tricor DF is compatible with most fertilizers, fungicides and insecticides. TriCor may be combined with other herbicides for enhanced weed control. Use rates of 3 to 4 oz/A if applying in combination with another herbicide. Before mixing with another herbicide, consult both product labels and a knowledgeable authority or UPI representative.
